### Types of water pipes

Follow the guidance below or contact a licensed plumber to determine the material of your water pipes. To identify the material of your service pipe material on private property, check your household water service connection, typically located in the basement.

Homeowners should identify and replace old household pipes, particularly galvanized plumbing and sources of lead. The type of household plumbing can vary throughout your household.

#### Lead

A dull, silver-gray color that is easily scratched with a coin. Use a magnet - strong magnets will not cling to lead pipes.

#### Galvanized

A dull, silver-gray color. Use a magnet - strong magnets will typically cling to galvanized pipes.

#### Copper

The color of a copper penny.

#### Plastic

White, rigid pipe that is joined to water supply piping with a clamp.

5. What kind of water lines do you have running throughout your home/structure? Mark all that apply:  
 Lead    Copper pipe without lead solder    Copper pipe with lead solder  
 Galvanized    Plastic (PVC, Pex, Etc)    Other \_\_\_\_\_
6. What kind of water service line do you have coming into your home/structure? (The first 18 inches into your building)  
 Lead Pipe    Copper Pipe    Lead Gooseneck    Galvanized    Plastic (PVC, Pex, Etc)  
 Other \_\_\_\_\_
