City Manager Mary Ellen Bechtel requested permission to Request Proposals for Real Estate Agent Representation for 200 Potomac Boulevard. This is to begin the process of selling the Municipal West Building. FGM inspected the Municipal West Building last year to identify any structural issues to maintain the building. There were exterior issues with the outside finish coat, caulk and sealant cracking throughout, roof issues, cracked and damaged walls due to water saturation, and mildew staining. There were also many interior issues including the lobby lighting, floor slab settling, mildew and mold growth present in several locations, and mechanical issues with the HVAC causing poor humidity and temperature control throughout the building. The estimated cost to repair this building was \$1.8 million to \$2.5 million dollars. It was also discussed with FGM how to optimize the underutilized parts of the building and to do that and the needed repairs, the estimate was \$3.5 million dollars. Holland reviewed this estimate, and they agreed with the proposal from FGM. The City's recommendation is to put the Muni-West Building up for sale. This Grant would cover creating an inventory of properties that may have some environmental contamination that prevents the development or redevelopment of the property. It also funds the Phase 1 and Phase II environmental investigation of the properties. This includes municipal property and can include private property if the owner chooses to participate. This program is NOT designed to require any further action than the study of the property to identify contamination and is NOT used by EPA to take action. There is no match to these grant funds and the City would like to engage a company to do the grant writing, inventory and investigation of any property that can be included in this program within the incorporated limits of the City of Mt. Vernon. The application period is for 30 days in September. It is important if the City would want to participate to get this started as soon as possible.
